

ECE 1100 Assignment No. 4

Due: Tuesday, November 14, 2023 (in class)

This is an individual assignment, i.e. you will submit your own work just like A1, A2 and A3 that you did.

Focus on the information in the class discussions on “Design, Teamwork, PM,” write a maximum 2-page essay that includes your thoughts on the design process and how in your view the process can be made as robust and useful as possible. Consider the potential constraints and boundaries that may exist.

Use the following question as a guide for your writing if applicable or desirable:

*A. How would **you** apply engineering design to produce solutions that meet specific needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors?*

Again, be as creative as you can, and don't worry about “complete correctness.” Feel free to write based on your current understanding of the topic. Use 11-point size font and single line space.

If your essay exceeds 1 page, print the essay out **double-sided** if your printer allows that.
