EE 4427L Laboratory Report Writing Guidelines

The Report of a previous Laboratory is due on the day the next following one starts, or as announced by the instructor.

Evaluation criteria: correctness and completeness (90%) and presentation (10%). Use of word processing software for report-writing is strongly recommended.

Laboratory Report organization:

Section 0. Cover Page with Lab # and title, name(s) and Bengal ID(s) (last 5 digits)

Section I. Objectives

Write down the purpose of the Lab in more details, using your own words.

Section II. Procedure and Results

Part 1.

Part 2.

…

(These must correspond to the project content. You need to illustrate what you did, and to ensure that your report captures all the results.)

Section III. Conclusion

Write at least two paragraphs, in your own words, to summarize the experience gained from this Laboratory. Be concise but sufficiently detailed to cover all the aspects in this section.

Section IV. Discussion

Discuss your design and implementation issues encountered in this project. Use at least one paragraph for your discussion.
